

The JMC Minibale 500 RDI System

**Make can
collection
pay!**

A small cost-effective can baler able to handle over 500kg day. Ideal for councils, supermarkets, charities and other volume can collectors

Specification:

Capacity: Up to 110kg/hr
Bale Size: 164mm x 164mm
Motor: 6.4" x 6.4"
Weight: 1.5kW, 2Hp
Length: 930kg
Width: 2103mm, 83"
Height: 552mm, 22"
Height: 1608mm, 64"

The Minibale RDI can baler has been designed specifically for the low-volume can collector. This machine is relatively inexpensive to buy, so it will help to make can collection pay. As with larger machines in the RDI range, the Minibale is totally automatic, its only requirement is a feed of material, so once started you can walk away and attend to other aspects of your business. The Minibale will crush and lock cans together to make dense cubes which do not need tying or strapping. Bales are simply ejected from the machine ready for transportation. The machine can be operated with an RDI sorting system to give complete separation of aluminium from steel cans, thereby ensuring the maximum possible return from your metal, with the lowest possible financial outlay on equipment.
